

Your whole church. One place.

People · Giving · Attendance · Events · Messaging —
the complete church management system.

worshipq.app

Free forever for your first 50 members

Fifteen minutes, four things

1

Where the time goes today

The everyday admin that eats your week.

2

Sunday, handled

Check-in, offering, and follow-up — live.

3

What you'll see on Monday

The numbers your leadership actually asks for.

4

Starting is free

No cost until your church outgrows it.

Your records exist — they're just scattered

The membership book

One copy. In someone's bag. Rewritten by hand every year.

A dozen WhatsApp groups

Announcements that half the church never sees.

The offering notebook

Totals that take an evening to add up before every meeting.

Nobody's follow-up list

The first-time visitor from three Sundays ago. Never called.

EVERYTHING IN ONE PLACE

One login. Your whole church.

People

Every member, photo, family and department

Giving

Tithes, offerings, funds and receipts

Attendance

Who came — counted in seconds

Events

Services, camps, registrations

Messaging

SMS your whole church or one person

Reports

Numbers for your board, on demand

Two hundred people through the door

1

Open the service

One tap creates today's service and opens check-in.

2

Scan or search

Members scan a QR code, or an usher types a name.

3

Instantly counted

The name turns green. Nobody gets counted twice.

Ask him: “How long does your headcount take on a normal Sunday?”

Whatever he answers, this takes about two seconds per person — and the register writes itself.

Every offering accounted for, automatically

Members give from their phone

Mobile Money or card. The money reaches your account, and the record is created the same second.

Receipts send themselves

The giver gets an SMS confirmation. No one has to write anything.

Funds stay separate

Tithes, building fund, harvest — each tracked on its own, so nothing is guessed at.

Statements in one click

Year-end giving statements per member, ready to print.

The software remembers, so you don't have to

Birthdays & anniversaries

An SMS goes out on the morning, in your church's name. You set it once.

First-time visitors

Every visitor becomes a follow-up task with a name against it — not a good intention.

Members going quiet

See who hasn't attended in a while, before they've gone for good.

Reach everyone at once

SMS the whole church, one department, or a single person.

The answers before they're asked

45

Members on file

14

Departments

6 mo

Giving & attendance trend

1 tap

Export to Excel

“Is the church growing?”

Attendance and giving trends month by month. Which departments are active. Who joined this year.
Every figure exports to Excel for your board pack — no one stays up the night before adding columns.

It works the way your church actually works

No app store, no installing

It opens in the browser on any phone, tablet or computer.
Share a link and your ushers are working.

Poor network? Still works

The desktop app keeps running with no internet and syncs everything the moment you're back online.

Everyone sees only their part

Your finance officer sees giving. A department head sees their members. You decide who sees what.

Your data is yours

Export everything to Excel whenever you want. Nothing is locked in.

WHAT IT COSTS

Start free. Pay only when you outgrow it.

Shall we set your church up right now?

It takes about ten minutes. We'll add your church name, your departments, and your first few members together — before I leave.
